### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: no prior art of record, alone or in combination, teaches or fairly suggests an attraction having a plurality of gondolas provided with a roller construction for continuous engagement with the track section and movement along the track section, the gondolas are linked by a drive cable driven by a motor positioned in the bottom section of the frame, each gondola is provided having supporting platform which is rotatable with respect to the gondola in such a way that the position thereof with respect to the surroundings remains the same. GB 22781 shows a similar attraction; however, the motor (i1) is placed on top of each gondola as shown in Fig. 3 and not at the bottom section of the frame (a). Brown U.S. Patent 3,596,905 also shows a similar attraction; however, motor (50) is placed on the outer ends of the support member (22). The motor drives a large wheel member (54) which is connected to the stub shaft between the tower and frame (22) and engaged by frictional driving wheels. It does not appear that the attraction could operate properly if the motor (50) is placed on the bottom section of the frame (22).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
